Î.	The aircraft factory at Cranienbaum (59 Received, probably erroneously, as Cran Combine IV in Moscow. It is a wartime hastily built wooden shops. It produce fighter planes. The engines are brough are installed there. Monthly production	denburg) is part of the factory, consisting chi- is wings and fuselages for t ready-made to the fac	efly of or Rata
2.	The factory employs approximately 2,000 workers, of whom 300 are PWs and 800 are women. Among the workers are 100 Chinese. The director of the factory is Engineer Major Rubik. The head of the engine installation section is Dr. Mikulin.		
3.	In a factory situated in Lawika Lotnisko (sic), East Prussia, the Soviets are building jet-propelled fighter aircraft (turbo system) at the rate of forty-five machines per month, according to a report dated December 1946. These aircraft are armed with four 37mm guns, two of which are aft and two forward, and two 20mm guns, both forward.
